

# Math 240: Basis of a Vector Space

Ryan Blair

University of Pennsylvania

Friday October 19, 2012

# Outline

- 1 Basis
- 2 Basis for function spaces

# Today's Goals

- 1 Be able to find and verify a basis of a vector space.

# Spanning and Linear Independence

## Definition

A set of vectors  $v_1, v_2, \dots, v_n$  **spans** a vector space  $V$  if every vector in  $V$  can be written as  $c_1 v_1 + c_2 v_2 + \dots + c_n v_n$  where  $c_i$  is a scalar for  $1 \leq i \leq n$ .

## Definition

Let  $v_1, \dots, v_m$  be vectors in a vector space  $V$ . The set  $S = \{v_1, \dots, v_m\}$  is **linearly independent** if  $c_1 v_1 + c_2 v_2 + \dots + c_n v_n = 0$  implies  $c_1 = c_2 = \dots = c_n = 0$ .

# Spanning and Linear Independence

## Definition

A set of vectors  $v_1, v_2, \dots, v_n$  **spans** a vector space  $V$  if every vector in  $V$  can be written as  $c_1 v_1 + c_2 v_2 + \dots + c_n v_n$  where  $c_i$  is a scalar for  $1 \leq i \leq n$ .

## Definition

Let  $v_1, \dots, v_m$  be vectors in a vector space  $V$ . The set  $S = \{v_1, \dots, v_m\}$  is **linearly independent** if  $c_1 v_1 + c_2 v_2 + \dots + c_n v_n = 0$  implies  $c_1 = c_2 = \dots = c_n = 0$ .

## Definition

Let  $\{v_1, \dots, v_m\}$  be vectors in a vector space  $V$ .  $\{v_1, \dots, v_m\}$  is a **basis** for  $V$  if the vectors are linearly independent and span  $V$ .

# Theorems Regarding Basis

## Theorem

*If  $V$  has a basis of  $m$  vectors, then any set of more than  $m$  vectors is linearly dependent.*

## Definition

The **dimension** of a vector space  $V$  is the number of vectors in any basis for  $V$ .

## Theorem

*If  $\dim(V) = n$ , then any set of  $n$  vectors in  $V$  that spans  $V$  is a basis of  $V$ .*

# Linear Independence of Functions

## Theorem

Let  $f_1, \dots, f_k$  be functions with continuous derivatives up to the  $k - 1$  order on the interval  $I$ . If the **Wronskian** of  $f_1, \dots, f_k$  is non-zero at some point in  $I$ , then the set  $\{f_1, \dots, f_k\}$  is linearly independent on  $I$ .
